

# Steve Niles

## Senior Software Developer

Toronto, Ontario, Canada

[steve.niles@gmail.com](mailto:steve.niles@gmail.com)

<https://steveniles.dev>

I have been programming as a hobby since childhood, and professionally for nearly two decades. Much of that has been building web-based enterprise software for customers across multiple industries, from real estate management to precision agriculture, digital media distribution, and more.

I work full-stack, architecting and implementing, as well as testing and documenting, from back-end code and database, to front-end functionality and design. I also have experience building traditional offline desktop applications and standalone libraries.

My passion is for creating robust, sustainable software systems, with a focus on quality craftsmanship. I have been on a personally funded sabbatical, and am looking for a new endeavor with a team that also feels strongly about building great software.

## Tech Stack Highlights

- C# / .NET, Java, PHP, C++, QBasic
- ASP.NET, OrmLite, Dapper
- JavaScript, React, AngularJS, jQuery, HTML, CSS, Tailwind
- SQL Server, MongoDB, RabbitMQ, Postgres
- Git, Github, TFVC

## Education

- [Brock University](#) - Honours BSc in Computer Science (2013)
- [Niagara College](#) - Computer Programmer Analyst Diploma (2009)

# Work Experience

## As Full-Time Developer

- [Method](#) Customer Relationship Management Platform (2021-2023)
- [Yangaroo](#) Digital Media Distribution System (2019-2021)
- [MRI](#) Real Estate Software (2013-2019)

Responsibilities included architecting, implementing, and documenting new features, as well as maintaining existing ones; Creating and supporting unit and integration tests; Mentoring junior and intermediate developers

## As Part-Time Teacher / Developer

- [Niagara College](#) First Year Object-Oriented Programming (2013)
- [Niagara College Research & Innovation](#) (2007-2013)

Roles included instructing students in GUI design and basic programming, as well as testing and grading student performance; Working on software research projects in partnership with local businesses; Personally [presenting software projects](#) at press conferences, trade shows, and to King Charles III, then Prince of Wales

## Open Source / Public Projects

- [Visual Studio / Dotnet Roslyn](#) - Found and fixed a bug in the static analysis code of Microsoft's .NET Compiler Platform
- [Jargon Tools](#) - A website I built to play around with the latest CSS and Tailwind
- [MandelZoom](#) - Mandelbrot Set screensaver built using WinForms and GDI+. Also includes technical guide on screensaver programming and image processing techniques
- [HowYouDoEverything.com](#) - A tiny piece of my philosophy. Call it art, but hanging on the web, not the wall
